

NTS Business Update : Covid-19 (Coronavirus)

19th March 2020

Dear Customer,

We are all preparing for the challenges that the Covid-19 virus will pose us in our family and business lives.

At NTS our main priorities are the health and safety of all our employees and being able to serve customers in a safe and professional manner. We have robust stocks and are in constant contact with our partner mills to better understand and manage the supply chain challenges. We aim to stay open for our customers and will strive to maintain our service levels during this period.

To this end we have been following the latest NHS and Government guidance and best practise in addition to taking advice from colleagues and suppliers in mainland Europe who have been living through this situation for some time.

As a result we have taken a number of steps ranging from stopping visitors to our site, introducing new and heightened hygiene procedures in our offices and works to facilitating home working for the majority of our office based teams.

Clearly the situation is ever changing and we shall review both current and new procedures required on an ongoing basis and will update you accordingly.

Should you require further information from us please discuss with your regular sales contact available on 01845 577 440.

Jonathan Sochart
Commercial Director
