

LASER PROFILING

3D LASER PROFILING
SERVICE

Bianco Group

YOUR NEW LASER PARTNER

NTS are always looking for new ways to add value for our customers, and so are very pleased to announce the addition of a 3D laser profiling service.

As with all things NTS, you can count on our work being carried out with our trademark high levels of quality and care, coupled with reliable, timely delivery.

QUALITY, RELIABILITY & SERVICE

When we looked at the marketplace, we found that the need for a high quality laser profiling service is growing.

We want to offer a new style of laser profiling, by doing things the NTS way. This means thorough processes, in-depth quality assurance checks, and great communication together with brand new, state-of-the-art laser equipment to deliver what you want, when you want it.

Our commitment to you is that you will always receive the high standards that you have come to expect from NTS.

PROJECT MANAGEMENT

We have invested in two, latest generation technology, jumbo tube laser machines which are housed in our new 11,000m² warehouse at Dalton. Our LT14 and LT24 are supplied by leading manufacturer BLM and mean we can machine the largest diameter steel tubes and open sections in the UK. As the only one in the country, our LT24 enables us to laser profile all the way up to 610mm (24") in diameter, up to 25mm in thickness and 15.5m length.

Both machines are located at our Dalton facility to ensure you can benefit from our unrivalled stocks of hollow sections and tubes together with this processing service. Deliveries are all on one truck providing an efficient service.

To ensure high service standards we are thrilled to be joined by several experienced and knowledgeable individuals bringing vital technical expertise to our sales and operations including in-house CAD/CAM specialists.

We look forward to becoming your preferred supplier for laser profiling.

Approvals & Memberships

For our customers: Quality Systems to ISO 9001 and CE Marking to BS EN1090

For our team: Health & Safety Systems to ISO 45001

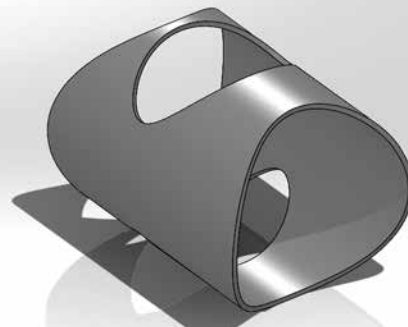

For our locality & our planet: Environmental Systems to ISO 14001
